

Expected Attendance: Laurel Sukup, Kevin Garstka, Kristin Hart, Alex Torres-Negron, Mark Thimke, Patti Stickney, Jeff Jaeckels, Jennifer Buzacky, Mike Zebell

Agenda

Review the following Type G Registration Permitting Scenarios

1. Existing Green Tier 2 facility expands on a Brownfield, facility has an existing process line with LACT that it wants to retain. Equipment being added in the expansion does not need any source specific conditions.
2. Existing Green Tier 2 facility expands on a Brownfield, facility has an existing process line with LACT that it wants to retain. Equipment being added in the expansion also needs a source specific condition to allow use of an alternate control device.
3. Greenfield facility constructs on a Brownfield. The new facility wants a source specific LACT.
4. Existing facility expands on a Brownfield, not a Green Tier facility. Facility has an existing process line with LACT that it wants to retain. Equipment being added in the expansion does not need any source specific conditions.
5. Discuss what happens if facility fails to obtain or subsequently leaves Green Tier.
 - a. Withdraws before obtaining Tier 2
 - b. Withdraws after obtaining Tier 2
